

Receive Emergency Alerts & Community Notifications

Island County is using a comprehensive emergency alert and notification system powered by **AlertSense**.

The system allows Island County to send emergency alerts, severe weather warnings, and community notifications that affect you. This free service makes it easy to receive alerts. To sign up for these alerts and notifications, please go to <http://www.islandcountywa.gov> and go to the Department of Emergency Management page, or use the QR code on this flyer.

We urge all individuals and businesses to register to ensure that we can alert you in the event of an emergency. Sign up today and share the types of emergency alerts, severe weather warnings and community notifications that you would like to receive, as well as your contact information and preferences (eg: text message to your cell phone, email, call to your landline phone number.) Registration is especially important for those who use a cellular phone or VoIP phone as their primary number, have an unlisted phone number, or who changed their phone number or address within the past year.

AlertSense enables Island County to issue emergency alerts to warn citizens of events such as severe weather, fire, flooding, hazardous materials, need for immediate evacuation, civil danger, local area emergencies, and missing persons.

Emergency alerts sent from Island County will come through with the following Caller ID displayed: **877-957-9563**.

If you would like to hear the last alert you received repeated, simply dial back the Caller ID number.

Any information you share will remain private and will only be used to deliver the emergency alerts and community notifications which you subscribe to.
