■ FAX: (360) 679-7306 ■ 1 NE 7th St., Coupeville, WA 98239-5000 ■ 121 N East Camano
Drive, Camano Island, WA 98282 ■ Phone (360) 387-3443
www.islandcountywa.gov/planning

INSTRUCTIONS FOR FILLING OUT AND SUBMITTING AN APPLICATION

- Type or neatly print all information. Only fill out those portions that are not shaded in gray.
- If someone other than the landowner is applying for the permit, the application must be accompanied by a notarized "Applicant Authorization Form". Without this form, the application will be incomplete and will not be accepted by County staff. The "Applicant Authorization Form" is attached to this application.
- This application is a "Master Land Development Permit" and must be filled out for all types of development permits. Depending upon your specific proposal you will need to fill out supplemental attachments to this application that provide more specific information. No development proposals can be reviewed using only this form so please ask what additional forms you will need.

Electronic Submittal Process

It is preferred for applicants to use the electronic submittal process to submit application materials. Please save all electronic files in **PDF file format**, using the following file naming procedure for submittal:

ApplicantLastName_DocumentName_DateSubmitted.pdf

Document names should be abbreviated; below is a list of common document names and their abbreviations:

Application APP	Arch Report ARCH	AsBuilt ASB	Site Plan SPLAN
Buffer Enhancement Plan BEP	Biological Site Assessment BSA	Certificate of Appropriateness COA	Field Indicators Worksheet FIELD
Elevations ELV	Mitigation Plan MIT	Geocoastal GEOC	Geotechnical GEO
Revisions REV 1,2,3,	SEPA Checklist SEPA	Wetland Report WET	Drainage Narrative DRNG

Example of file naming using document abbreviation: **Johnson_APP_091324.pdf**

Once all files have been saved using the naming procedure above, all files can then be submitted to: planningdept@islandcountywa.gov Emails over 7 MB should be sent through a file sharing application, or contact the Planning Department for an FTP sharing link. Once application materials have been reviewed by planning staff and deemed sufficient for submittal, the applicant will receive an email along with an invoice and payment instructions.

All fees must be paid within 14 calendar days, or the application will become null and void, cancelling the application.

After payment is received, the applicant will receive a letter of completeness indicating that the review period has begun. If the application is deemed incomplete, the applicant will receive a letter stating that the application is incomplete and requires revisions.

IF APPLICANT CHOOSES IN PERSON SUBMITTAL AN APPOINTMENT IS PREFERRED

Whidbey: call 360-678-7339

Camano: call 360-387-3443

APPLICANT AUTHORIZATION FORM

If you are authorizing an agent or contractor to apply for permit(s) on your behalf, you must complete this form providing authorization for a designated agent to apply for permit(s) on your behalf. This form is required for the protection of the landowner. A permit/application authorizing an agent to act on the landowner's behalf that is not accompanied by a signed and notarized Applicant Authorization Form will not be accepted.

I/We, _____ the owner(s) of the subject property, understand that by completing this form I/We hereby authorize _____ to act as my/our agent. I/We understand that said agent will be authorized to submit applications/permits on my/our behalf. I also understand that once a permit/application has been submitted that all future correspondence may be directed to said agent.

APPLICATION CHECKLIST

Please use the following checklist to ensure you provide all the items required under Island County Code. If you believe that an item is not applicable, write N/A and explain why in the blank. All of the blanks under "Applicant Use" must be filled in for this application to be accepted as complete and for the review process to begin. This checklist applies to all land use applications. Depending upon the type of application, additional information may also be required which will be outlined in any of the additional forms attached to this Master Permit Application.

Applicant Use	Application Requirements	County Use Only
	<ol style="list-style-type: none"> 1) Payment, as established by the Board of Island County Commissioners 2) Completed Master Land Development Permit Application 3) Electronic copy via email, thumb drive, or file sharing link containing complete application and associated reports (.pdf format requested) . Please send separate documents as separate <u>files</u>. For example, the application form, SEPA checklist, wetland report, BSA, etc. should all be separate files with clear file names. 4) Completed Field Indicators Worksheet (from Wetland ID Guide) <ol style="list-style-type: none"> a) Land Use Intensity Worksheet (If applicable) b) Wetland Buffer Worksheet (If applicable) 5) Completed project specific Forms (e.g. Form A Variance, etc.) 6) A legible plot plan that shows all of the following (<u>except</u> for final long and short subdivisions – for short subdivisions see Form H; for long subdivision see Form J for map requirements; For BLA or Lot Combination see Form BB): <ol style="list-style-type: none"> a) Drawn to a standard <u>engineering</u> scale (specific Forms will provide an appropriate range of scales). Indicate scale. b) North arrow c) Boundaries, dimensions and area of lot (square feet or acres) d) Name of road(s) bordering the property and their width e) Land features. Show the top and toe of all slopes, the direction of slope, percentage of slope, seasonal drainage ways, soggy areas, ditches, ravines, lakes, ordinary high water mark of shoreline, etc. f) Critical Areas. Show protected species habitats, geologically hazardous areas, floodplains, aquifer recharge areas, streams, wetlands as well as all their associated buffers on-site or off-site when they may affect the proposal. <i>(note: if a feature is shown on the County's Critical Areas map it must be shown on the plot plan; if you do not believe that feature is present please describe).</i> 7) If the proposal is in an archaeological area, a report must be submitted that identifies resources and how they will be protected. 8) Assessor's quarter section map(s) that identifies the subject site and any contiguous properties in the same ownership (not needed for final short and final long subdivisions). 9) Vicinity map and specific written directions on how to find the site. Provide the map and directions together on a single 8.5 by 11 inch sheet. The map must be detailed enough to clearly locate the site and must identify major arterials, county roads, natural features, landmarks, city limits or any other feature that will help describe how to find the site. A copy of a general road map that highlights the location of your proposal is ideal. 	

FORM F – SUPPLEMENTAL SITE PLAN REVIEW APPLICATION CHECKLIST

In addition to the items identified in the Master Permit Application Checklist a Site Plan Review application also requires the following additional items. For those items below that must be shown on a plot plan please show them on the same plot plan required under item #5 of the Master Permit Application Checklist – it is not necessary that you prepare two separate plot plans.

APPLICANT USE	APPLICANT USE	COUNTY USE ONLY
	<ol style="list-style-type: none">1. On a separate document provide a written description of proposal.2. On a separate document provide a detailed written statement addressing required criteria and standards (not required for Home Industries).3. Legal description of the property as it was last recorded.4. Proposed source of water (e.g. water availability verification form, letter of commitment from water provider, well site location and/or verification).5. Copies of soil logs registered with the County Health Department or a letter of commitment from a sewer district6. Copy of approved Certificate of Transportation Concurrence, if applicable7. Documentation of legal means of access to a public road (e.g. existing access permit number, access permit application, recorded easement).8. For Type III applications the following must be provided:<ol style="list-style-type: none">a. Community Meeting required: Submit meeting notes, a tape copy of the recorded meeting and an affidavit of notice of the meeting.b. Pre-Application Conference required: Provide the date of the meeting (must be after the community meeting but within 6 months of the date this application is submitted).c. On a separate sheet provide the names and addresses of property owners within a 300 foot radius of the site.d. An Assessor's quarter section map that shows all parcels within a 300 foot radius of the site.	

APPLICANT USE	APPLICANT USE	COUNTY USE ONLY
	<p>9. Please show the following additional items on the plot plan required under item #5 of the Master Permit Application Checklist:</p> <ul style="list-style-type: none"> a. Location, size, height, number of stories, and gross floor area for all structures or other improvements, existing and proposed. Includes buildings, drainfields, wells, driveways and fences. Label each as existing or proposed. b. Land features. Show the top and toe of all slopes, the direction of slope, percentage of slope, seasonal drainage ways, soggy areas, ditches, ravines, lakes, ordinary high water mark of shoreline, etc. c. Critical Areas. Show streams, wetlands, protected species habitat, geologically hazardous areas and archaeological sites. For any of these features also show their buffers. <i>(Note: if a feature is shown on the County's Critical Areas map it must be shown on the plot plan; if you do not believe that feature is present please describe).</i> d. Location, dimensions and volume of all propane tanks, fuel tank, etc. Label each as existing or proposed. e. Location and dimensions of all decks, roof overhangs, porches, cantilevers, bay windows, retaining walls, patios or chimneys. f. Distance between property lines and existing and/or proposed structures. Also show distances between these buildings. g. Location of proposed entrances and exits, location and width or existing and proposed driveways/accesses serving each structure, direction of traffic flow into and out of off-street parking and loading areas, location and size of each parking space and each loading berth, areas of turning and maneuvering vehicles, and relationship of circulation with adjacent properties. Show access permit numbers, if assigned. 	

APPLICANT USE	APPLICANT USE	COUNTY USE ONLY
	<ul style="list-style-type: none"> i. Approximate location, width, and name of each recorded easement, right-of-way for public service or utilities, serving or affecting the subject property, and existing and proposed public and private roads in or adjacent to the site. Label them with the existing and intended use and the Auditor's File No. j. Indicate location of septic tank, drainfield, reserve area and tightline between house and septic tank. Show distance between drainfield and reserve area to property lines. Indicate if hooked up to sewer. k. Indicate location of water lines, well, and pollution control radius. Note: A pollution control radius around an off-site well may impact your project if it overlaps onto your parcel. l. If the proposal includes a subdivision, show the location and dimension of all proposed and existing lots. Show the location of all soil test holes on each proposed lot. Indicate location of septic tank, drainfield, reserve area and tightline between house and septic tank and the distance between the drainfield and reserve area to existing and proposed property lines. Also provide the legal descriptions of existing and proposed parcels and a legend that includes a site address and Assessor parcel number of the parcel proposed for division. m. Drainage. Location and description of all existing and proposed drainage features and systems, including natural drainage ways, culverts and ditches. Show the direction of water flow. n. Existing and proposed vegetation. Please be specific about the type, e.g. grasses, types of trees, etc. o. Clearing limits. Show all areas where trees and brush currently exist and where it will be cut or removed. p. Erosion and sedimentation control plans. Show all areas where soil will be exposed along with measures to limit the erosion and transport of silt and sediment. 	

APPLICANT USE	APPLICANT USE	COUNTY USE ONLY
	<p>q. Layout of all existing and proposed pedestrian walkways, landscaped areas, curbs, gutters, the extent of street paving, and the location of existing and proposed fire hydrants, on-site water sources, and sewage disposal systems.</p> <p>10. Phasing Plan, if development will not occur at one time.</p> <p>11. Geological report including:</p> <ul style="list-style-type: none"> a. Types of materials present on the site. b. Approximate quantity and quality of each material. c. Approximate lateral extent of deposits. d. Approximate depth of deposits. e. Approximate depth of overburden. <p>12. Visual Analysis, to identify the effect of the proposed development on surrounding properties and uses.</p> <p>13. General landscape buffering plan showing measures to be taken to screen the surface mine from view.</p> <p>14. Architectural Plan showing elevations and specifications as to type, color and texture of exterior surfaces of proposed structures.</p> <p>15. Sign Plan, drawn to scale, showing the location, size, design, material, color, and method of illumination of all exterior signs.</p> <p>16. Lighting Plan</p> <p>17. A plan to limit and/or control noise, dust, dirt, heat, glare, vibration, odors, toxic gases, and liquid and solid waste.</p> <p>18. Reports/Plans required by Critical Area Regulations.</p> <p>19. Drainage Narrative or Preliminary Drainage Plan.</p> <p>20. SEPA - Environmental Checklist, if required.</p>	

APPLICANT USE	APPLICANT USE	COUNTY USE ONLY
	<p>21. Reclamation plan including but not limited to:</p> <ul style="list-style-type: none"> a. A map or plan including a timetable and description of the proposed reclamation including grading, final slope angels, highwall reduction, benching and terracing of slopes, slope stabilization and revegetation where applicable, and erosion control. b. Description of topsoil stripping and conservation during storage and replacement. c. Plan and description of anticipated final topography, water impoundments, and artificial lakes on the property. d. Description of plans for disposition of surface structures, roads, and related facilities after cessation of mining. e. A plan for disposal or treatment of any harmful or toxic materials found in any formations penetrated by the surface mining or produced during the processing on the property, and of chemicals or materials used during the surface mining. f. The estimated cost of reclamation for the total project. g. A timetable of the commencement, duration, and cessation of surface mining. <p>22. An additional document showing typical cross section showing the extent of overburden, extent and type of resources and water table at the time of application.</p> <p>23. Proposed primary travel routes to be used to transport the mined material to processing plants or markets away from the property.</p>	

Island County Planning and Community Development

Field Indicators Worksheet

The Field Indicators Worksheet will help you and the County determine if a wetland or wetland buffer is on your property. Applicants for permits for single family residential uses must either complete this Worksheet or, at their option, hire a wetland professional to complete a Wetland Report that includes the elements of the Worksheet. All other applicants (commercial or non-residential) must do the latter, if the County verifies that the development proposal is for land that contains or is affected by a wetland.

The comments section of this Worksheet may be used to record any particulars or information about your property. You may attach additional pages and photographs.

The County will verify the information provided in this Worksheet or related wetland report.

This Worksheet must be included with every application for development. Prospective purchasers may also ask the County to review the Worksheet to assist them in determining whether the property they are interested in purchasing contains wetlands.

Applicant Name (please print): _____

Date: _____

Parcel or Key Number: _____

Hydrology

The presence of water is the most obvious and common indicator of a wetland. There are several factors that must be considered in describing whether or not you have water on your property. Some wetlands have standing water all year long; others are soggy only during wetter months of the year; and, others appear wet only after storm events.

1. Is there ever standing water on the property?

☐ Yes ☐ No

If No, proceed to question #3

If Yes, is it:

☐ 4 weeks - 4 months ☐ 4 months - 8 months - Seasonally ☐ 8 months - Year Round

2. If you answered yes to question #1, are the surrounding adjacent areas:

Topographically higher ☐ Yes ☐ No

Topographically lower ☐ Yes ☐ No

Topographically the same elevation ☐ Yes ☐ No

3. When you dug the hole, did you observe any water within 10 inches of the ground surface?

☐ Yes ☐ No

4. Identify any features through which water flows onto your property (Check all that apply)

☐ Stream ☐ Culverts ☐ Ditches ☐ Roadside Ditch
☐ Storm Drains ☐ Ponds, lakes, estuaries ☐ Pumps ☐ Other _____

5. Identify any features through which water flows off of your property (Check all that apply)

☐ Stream ☐ Culverts ☐ Ditches ☐ Roadside Ditch
☐ Storm Drains ☐ Ponds, lakes, estuaries ☐ Pumps ☐ Other _____

6. Are there defined ditches/channels on, or near your property that have water?

☐ Yes, there are ditches/channels that have occasional water flow (e.g. after storm events).

☐ Yes, there are ditches/channels that have regular water flow during wet months.

☐ Yes, there are ditches/channels that have water flow all year long.

☐ No, there are no defined channels

If Yes, how wide is defined channel?

☐ Large (>2 ft across) ☐ Small (<2 ft across) ☐ Grass Lined Swale (dried up pond)

Comments:

Hydrology Map

Please refer to the *Hydrology Map Example* found in the *Wetland Identification Guide* for instructions

Draw a close approximation of the features you listed in questions 1-6 of the Hydrology section of the Field Indicators Worksheet. Please label the features and approximate dimensions. You may also include areas where wetland vegetation was observed and sites where you performed your soil samples. An organized and informative drawing will help make our site visit more efficient. For greater accuracy, you may obtain an aerial map of your parcel from the Island County Planning and Community Development offices, and use it as the base layer for your map. The Hydrology Map section of the *Island County Wetland Identification Guide* has further information.

Comments:

Vegetation

Only certain types of vegetation can survive in wetland conditions. In fact, some plants, trees and shrubs live nowhere else except in wetlands, e.g. skunk cabbage. Other types of vegetation are tolerant of both wet and drier conditions, e.g. salmonberry and alder. Most trees and plants look different depending upon the time of the year. This can make it difficult to identify exactly what's on your property. Numerous photographs of the more common types of wetland vegetation are shown during different seasons. **Please include these observations in your Hydrology Map.**

7. Are there any native wetland plants on the property that are identified in the Wetland Vegetation section of the Wetland Identification Guide? (Check all that apply)
- | | | | |
|---|--|--|--|
| <input type="checkbox"/> Slough Sedge | <input type="checkbox"/> Cooley's Hedge Nettle | <input type="checkbox"/> Crabapple | <input type="checkbox"/> Red Stemmed Dogwood |
| <input type="checkbox"/> Labrador Tea | <input type="checkbox"/> Water Parsley | <input type="checkbox"/> Skunk Cabbage | <input type="checkbox"/> American Speedwell |
| <input type="checkbox"/> Cat Tail | <input type="checkbox"/> Common Rush | <input type="checkbox"/> Willows | <input type="checkbox"/> Red Alder |
| <input type="checkbox"/> Salmonberry | <input type="checkbox"/> Nootka Rose | <input type="checkbox"/> Bull Rush | <input type="checkbox"/> Western Red Cedar |
| <input type="checkbox"/> Pacific Silverweed | <input type="checkbox"/> Sitka Spruce | <input type="checkbox"/> Hardhack | <input type="checkbox"/> Grasses (other than lawn) |
-
8. Are there any non-native wetland plants on the property that are identified in the Wetland Vegetation section of the Wetland Identification Guide?
- | | | | |
|--|---|--------------------------------------|---|
| <input type="checkbox"/> Creeping Buttercup | <input type="checkbox"/> Reed Canary Grass | <input type="checkbox"/> Yellow Iris | <input type="checkbox"/> Himalayan Blackberry |
| <input type="checkbox"/> Eurasian Milfoil | <input type="checkbox"/> Evergreen Blackberry | <input type="checkbox"/> Velvetgrass | |
| <input type="checkbox"/> Canadian Thistle/
Bull Thistle | <input type="checkbox"/> Hairy Willow-herb | | |

Comments:

Soil

While water and vegetation can be identified by simply observing what is on your property, learning about your soils will take a little more work. Soil characteristics change as a result of the regular presence of water. Minerals in the soil will start to rust and organics are unable to decompose. By digging some holes you can see whether or not the area you are looking at is in fact a wetland. The Wetland Identification Guide's Soil section provides additional information that you may find useful in answering the following questions. You will need to dig a hole 12 inches deep in order to answer the following questions. **Please include the locations where you took your soil samples in your Hydrology Map.**

9. Indicate the color of the soil at the bottom of the 12 inch deep hole that you dug.
- | | | |
|-------------------------------------|--|--------------------------------|
| <input type="checkbox"/> Dark Black | <input type="checkbox"/> Grey w/rust spots | <input type="checkbox"/> Brown |
|-------------------------------------|--|--------------------------------|
-
10. Does the soil smell sulfuric? (like rotten eggs)
- | | | |
|------------------------------|-----------------------------|-----------------------------------|
| <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> At Times |
|------------------------------|-----------------------------|-----------------------------------|
-
11. If you take a tablespoon size sample of the soil and squeeze it, is it saturated with water?
- | | | |
|------------------------------|--|--|
| <input type="checkbox"/> Yes | <input type="checkbox"/> Moderate/Soil is damp | <input type="checkbox"/> No. Soil is dry |
|------------------------------|--|--|

Comments:

2. Provide names, addresses, and telephone numbers of associated professional consultants such as architects or engineers not identified on the cover sheet:

3. Provide the names, addresses, and telephone numbers of all operators:

4. On a separate document, provide a detailed written description of the proposal. Include descriptions of:

- a. The general purpose and scope of the project.
- b. Features and pertinent matters not readily identifiable in map form.
- c. Specific uses permitted on the site.
- d. Necessary or proposed restriction.

5. A report prepared by a professional geologist which shall include at least the following:

- a. Types of materials present on the site.
- b. Approximate quantity and quality of each material.
- c. Approximate lateral extent of deposits.
- d. Approximate depth of deposits.
- e. Approximate depth of overburden.

6. Total square footage of all structures on site: _____ sq. ft.

Square footage dedicated to commercial use: _____ sq. ft.

Total impervious surface on the site (e.g., pavement, buildings, gravel, etc.):

_____ sq. ft.; Percent of site _____%

7. Will the proposal create any new parcels?

☐ Yes

☐ No

If yes, how many parcels will be created? _____

8. Describe proposed source of water supply, including the name of the provider if it is to be served by a public system:

9. Describe the proposed method of sewage disposal, including the name of the district if it is to be served by a public sewer system:

10. Provide the Certificate of Transportation Concurrency Number: _____

11. Will the proposal access directly onto an adjacent public road?

☐ Yes

☐ No

If yes, provide a copy of the existing Access Permit or submit an Access Permit Application with this application. If no, provide documentation of the legal access to a public road.

12. Identify any existing uses that are already taking place on the property (e.g., agriculture, forestry, etc.). Provide the permit numbers of any previously approved permits:

13. Are the existing uses allowed in the current zoning designation of the site?

☐ Yes

☐ No

If no, describe which uses are not allowed and when they were established:

Yes

No

15. On a separate document provide a visual impact analysis and general landscape/buffering plan showing measures to be taken to screen the surface mine from view.

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on the right side, suggesting it's resting on a surface.

17. In a separate document include a reclamation plan which shall include, but not necessarily be limited to:

- a. A map or plan, a timetable and description of the proposed reclamation including grading, final slope angles, highwall reduction, benching and terracing of slopes, slope stabilization and revegetation where applicable, and erosion control.
- b. Description of topsoil stripping and conservation during storage and replacement.
- c. Plan and description of anticipated final topography, water impoundments and artificial lakes on the property.
- d. Description of plans for disposition of surface structures, roads, and related facilities after cessation of mining.
- e. A plan for disposal or treatment of any harmful or toxic materials found in any formations penetrated by the surface mining or produced during the processing on the property, and of chemicals or materials used during the surface mining.
- f. The estimated cost of reclamation for the total project.
- g. A timetable of the commencement, duration, and cessation of surface mining.

18. Pre-Application Meeting: All Type III Decisions require a formal Pre-Application Conference no more than 6 months prior to submittal of this application.

Pre-Application Conference Date: _____ File Number: PRE ____/____
