STANDARD OR GOAL

Source: Healthy People 2020
Source Link:
Standard or Goal: 83.9% *

*Personal HCPs. Healthy People 2010 and 2020 define a “usual” HCP from a set of four questions in the Medical Expenditure Panel Survey (MEPS). While the concepts of a usual HCP and a personal HCP are similar, we do not know whether data from MEPS and BRFSS are comparable. The 2010 national goal for usual HCP was to have at least 85% of Americans having a usual HCP. The nation did not achieve this goal: only about 76% of Americans had a usual HCP in 2007. As a result, the goal for 2020 was reassessed and lowered to 83.9%.
