

The ILIO Technical Committee recommends that the following scoring be applied to the 2018-2022 Near-term Actions (NTA) for ranking and to select the local NTA to apply the FY2018 NEP local funding allocation (\$100,000):

1. Reweight the approved 2018-2022 NTA scoring rubric to put emphasis on contribution to recovery:

Criterion	Weight
Alignment	1
Likelihood of success: human	1
Likelihood of success: technical	1.5
Contributions to Recovery	2

2. Add a score utilizing the following 3 criterion from the 2017 NTA Selection Criteria:
 - Will the current \$100,000 NEP funding allocation catalyze the project to completion?
 - 3 points – Project will be completed (final phase) with 2018 NEP funding
 - 2 points – Project will be moved forward significantly with 2018 NEP funding.
 - 1 point – NEP will only fund a preliminary phase of the full project.
 - Is the project timely? Will it support other actions currently underway?
 - 3 points – Project must be implemented within the next year.
 - 2 points – Project is critical but not under near-term constraints.
 - 1 point – Project is not time bounded.
 - Does this NTA support planning or action?
 - 5 points – Action
 - 3 points – Planning
3. The ILIO Technical Committee will utilize the total scoring to rank the 2018-2022 NTAs. The ranking will be used to inform the discussion for the selection of the 2018-2022 local NTA to submit to PSP for FY2018 NEP local funding.
