Join The [Northwest Straits Foundation's](#) free *Shore Friendly Living* Virtual Workshop:

## [Vegetation Management for Shoreline Landowners](#)

Effective management of vegetation on marine shorelines can make the difference in slowing erosion, reducing stormwater runoff, and improving nearshore habitat for salmon, forage fish, and Orcas.

You are invited to join this **free** "*Shore Friendly Living*" virtual workshop series on **Thursday, October 21st from 6:00-8:00pm** to learn the benefits of using native vegetation for slope stability and habitat from Ben Alexander of Sound Native Plants. Some additional topics Ben will cover include: soil composition and drainage, removing invasive plant species, native plant selection, and planting techniques for bluffs and shoreline properties.
