

Allocated = Federal Funds set aside for distribution by RTPOs and MPOs.

IRTPO's STBG Allocation is \$1,052,806. (This is up from the previous allocation level of \$1,026,328.)

IRTPO's TA Allocation is \$96,233. (This is down from the previous allocation level of \$104,179.)

Awarded = The funds IRTPO decides to distribute to member agency projects based on the Call for Projects.

Programmed = The projects with federal funds involved that are entered in the STIP (based on the RTIP).

The programmed dollars must be subtracted from the total federally allocated funds, BUT we can award and program projects out for six years.

The WSDOT Fiscal Constraints spreadsheet shows projects that are programmed through 2023 (a four-year span). However, IRTPO awards projects out six years.

Obligated = programmed projects that have gone through the federal grant agreement process. WSDOT local programs manages and obligates the federal funds.

Projects that have been obligated fall off of the WSDOT four-year Fiscal Constraints spreadsheet, but are tracked on the second page (back side).
